

Specified Caregiver Shower Curtain

Shall be designed to shield caregiver attendant from water while allowing reachable access to assist bather. The curtain must meet or exceed the following requirements. Curtain shall be equipped with weights in bottom seam to resist drifting, engineered and tailored specifically for use in commercial ADA barrier-free, curb-less and low threshold shower stalls or bathtubs. The width shall be 66" or a minimum six inches greater than a 60" shower opening to prevent water spillage in corners. The curtain length shall be at a standard care attendant 33" height providing full side to side access within the shower stall. Curtain must be installed to touch the floor of the shower to effectively control water spillage. Material shall be a nylon fabric, standard color white, machine washable, splash, mildew and fungus resistant. Curtain shall be provided for showers (Insert fixture #) by KR Specialties Inc. Ph: (781)422-2273
